

ASBURY FLUXMASTER

DEGASSER 752-753-759\*

**CHARACTERISTICS:** ASBURY No. 752-753 works effectively to remove hydrogen gas while fluxing suspended oxides and other impurities from the melt. It is designed to release a greater number of smaller gas bubbles over a longer period to give the most efficient cleaning with a minimum of smoke and fumes.

**APPLICATION:** Degasser No. 752 is provided in 4 oz. pills wrapped in polyethylene sleeves.

Degasser No. 753 is the same formulation in 2 lb. size.

Dosage required will depend on gas condition of the metal but typically 4 oz./100 lbs. of melt is a good starting point. The 4 oz. pill is principally used in crucible and small reverb melting.

**PACKAGING:** No. 752 is packed in 65 lb. cartons with each sleeve of pills individually wrapped in moisture-resistant sleeves.

The 2 lb. Degasser No. 753 is similarly packed in 54 lb. cartons.

\* **759 SPECIAL DEGASSER:**

Degasser No. 759 is a 2 lb. special product guaranteed to have no less than 60% hexachloroethane.

Packed in fiberdrums -- 402 lbs. each
