ASBURY FLUXMASTER

#761 BRONZE DE-GAS

CHARACTERISTICS: ASBURY #761 **Bronze De-gas** is designed to remove hydrogen from copper, brass and bronze alloys.

APPLICATION: Quantity of ASBURY #761 should not exceed 0.5% of total metal weight.

Sprinkle **half of flux amount** on the solid charge.

When charge is completely melted, skim the dross and **plunge other half** into the metal.

Move plunger around in order to provide a good contact with the entire bath.

As soon as bubbling stops, skim the dross.

The metal is then ready for the next processing step.

PACKAGING: Multi-wall paper bags: 50-lb and 20-kg

Fiber drums: 125-lb and 50-kg
500-lb and 200-kg
